

High temperature Procedure

In order to comply with safer sleep requirements if temperatures reach over 28c in the owl cabin then management to consider shutting Squirrels early to enable children to nap at home.

If temperature rise over 30 degrees we may consider closing the site early before the hottest part of the day and a refund will be issued or time back in lieu. During periods of hot weather we will monitor the weather closely and keep parents updated on any potential closures or early finishes.

Prior to a period of predicted high temperature parents will be sent a newsfeed asking all parents to send children in already wearing a good quality sun cream and with a hat.

Long sleeves and long trousers are preferable and light trainers or pumps. Staff will message parents if a child is inappropriately dressed and reserve the right to refuse entry or send a child home if they feel a child's health and or well being may be at risk due to heat or inappropriate clothing.
